Steering committee scorecard

Current recommendation: HOLD deployment. Proceed only with bounded discovery.

Measure / owner	Pass threshold and method	Current evidence
Process baseline / analyst	Reconcile cases/events and ownership definition; report handoffs, A-B-A returns and elapsed intervals.	7,554 public cases; 9,454 handoffs. Historical observational evidence only.
First-time-right / AI lead	>=80% AND >=10 percentage points above frozen keyword baseline. Review counts as unassigned. Case-level holdout; no test tuning.	FAIL: lexical 10% vs 90%. Synthetic correlated 50-ticket test; real-text validation not run.
Auto-assignment safety / service owner	Wrong auto-assigned / all auto-assigned <=5%; require one-sided 95% binomial upper bound <=5% before expansion.	INSUFFICIENT: 0 wrong of 5 auto-assigned is not enough safety evidence.
Escalation / service owner	Review tickets / all eligible tickets <=40%. Review effort included in cost model.	FAIL: lexical review 90%.
Fix usefulness / resolver lead	>=70% relevant and actionable; blind review of >=50 suggestions, with source validity checked. Report reviewer disagreement.	UNMEASURED. Extractive suggestions available; independent ratings absent.
Process outcome / analyst	>=50% fewer observed handoffs vs control; p90 resolution time no worse. Check workload and case-mix balance.	UNMEASURED. BPI history is not an intervention study.
Adoption / product owner	>=60% of eligible resolvers weekly active for two consecutive weeks; record rejection reasons and training completion.	UNMEASURED. No live users.
Value / Finance	Positive annual net value and <=12-month payback; validate effort and cost inputs, realized capacity and attribution.	SCENARIO ONLY: $25,332 annual net; 5.7 months. Current router does not qualify.

Decision rules

Any failed safety gate blocks expansion. Missing evidence is not a pass. Publish confidence intervals and subgroup outcomes, not just aggregate accuracy. Discovery may continue within its cap; pilot and expansion funding are separate sponsor decisions.
